

## **What do I want to learn or understand better?**

---

This week i took my focus out of the coding itself, and focused to learn how to improve our efficiency and teamwork. I wanted to learn more about the group to give suggestions how to improve quality of code in the shortest amount of time

## **How can I help someone else, or the entire team, to learn something new?**

---

By bringing these suggestions on how we, for example, could streamline our sprint planning I gave examples on how to work efficiently and could implement methods that worked for our group.

## **What is my contribution towards the team's use of Scrum?**

---

Following this week i have taken a more administrative role, making myself responsible for structuring meetings, writing agendas, driving the meeting forward as well as be a positive force to remind about deadlines, which we have not been to good to follow. This had so far had good results.

## **What is my contribution towards the team's deliveries?**

---

Being sick this week, spending most of time in bed, not too many hours were spent coding. Instead i did what I could regarding the team reflection and planning.
