# What do I want to learn or understand better?

As I am still learning all the applications and how their connections, this is my prior focus.

## How can I help someone else, or the entire team, to learn something new?

While not being afraid to ask "stupid" questions, the programming process slows down when people with knowledge takes time to explain to me. This helps everyone involved in the coding process, since i might ask questions other might not know and the programmer who understands the issue needs to explain it, possibly increasing his understanding of the system itself.

## What is my contribution towards the team's use of Scrum?

By being a driving force in the sprint planning as well as bringing up questions and taking notes from the meeting with our supervisor, I pinpoointed factors relevant for the teams progress in the coming sprint

## What is my contribution towards the team's deliveries?

This week I, apart from being a driving force in the sprint planning aswell as retrospective, have mainly contributed to the design process of the tournament cards.
